

## Leadership Skills for Scrum Masters

Leading Scrum teams effectively – even without solid line managerial responsibility

### Why

The Scrum Master plays a diverse role in organizations. The role is not always clearly defined or properly and purposefully delineated from other roles. We reflect on the role, responsibility, attitude and peer status as servant leader, and help the participants communicate in a goal-oriented manner with their organisation.

### The concept

Alternating between short input sessions and discussions on concrete examples from daily working life, we stay very close to the participants' real challenges as leaders. We start with the special aspects of leadership the role of the Scrum Master brings

### Format

In 2 days, we work in short content sprints and, above all, using concrete practical examples.

### Who for

Experienced Scrum Masters who want to increase their effectiveness in their organisation.

### Contents

- Leadership and responsibility
- Communication and conflicts
- Servant leadership
- My mindset as a Scrum Master

with it, highlight specific conflicts and, in the final session, take an intensive look inside. The participants receive specific tools and benefit from the comprehensive experience of the trainers and other participants.

### For each session: preparatory and transfer assignments via the P1 e-learning platform

Short learning units between the sessions enable participants to consolidate what they have learned and familiarize themselves with new issues – at the time of their choosing. In this way, the sessions, daily working life and short learning units are optimally interlinked to enable iterative implementation of what has been learned.

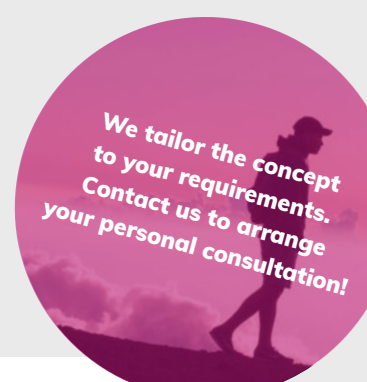

### Information on organisation and program:

The Leadership Skills for Scrum Masters training course is aimed at those individuals responsible for successfully incorporating Scrum into their companies. The participants should

- have practical experience as Scrum Masters
- ideally be certified as a Scrum Master
- have already addressed the topic of leadership in an agile environment
- want to find out more about why leadership is the biggest lever for the goal-oriented further development of organizations

If the above requirements are either not or only partially fulfilled, if you want to focus on other areas or if you want to work in an analog way: let's talk.
