

## Suddenly Remote Work!?

Virtual journey to develop a new leadership & collaboration concept

### Why

Because, so far, only one is certain: there is no going back to the situation before March 2020. The future of leadership and collaboration is here. Now! How can we actively shape it? What needs to be considered in the New Normal? Working from home? Limited space in the office? Virtual communication and meetings? New tools? Changed workflows? Time to re-organise!

### The concept

For most teams, future collaboration is a true change process. More important to establishing a new form of self-organisation and teamwork will be, among other things, trust, changed communication, and focus on transparency.

### Format

Multi-modular virtual format supplemented by asynchronous learning and transfer units on our digital learning platform

### Who for

For leaders who want to adapt the way they collaborate to the new parameters and develop them to be fit for the future

### Contents

- Leadership, remote collaboration: a disruptive change
- Establishing and fostering trust and confidence in the system
- Communication in the virtual world
- Creating transparency and new methods of collaboration
- Self-organisation and motivation
- Transfer consulting, implementation, virtual team development

In this training format we first shine a light on: Why are these aspects in particular what will make collaboration and leadership successful in the future? We support you with tools, application and reflection activities, and sharing of experience.

### Future-proof collaboration and leadership

The virtual format Suddenly Remote Work supports the evolution away from a face-to-face to a blended collaboration culture. In addition to new tools and processes, this also means developing a new mindset and additional skills. The starting point for this are the individuals and their organizational environment.

### Information on organisation and program:

The format can be conducted as a supplement to ongoing development programs or on an organisation-specific basis. Your organizational context (culture, level of digitalization, organisation, sector, etc.) is an important part of the format. The 6 modules take half a day each and are ideally organised as 3 learning days with one week transfer time each between the live web sessions.

The participants are given access to our virtual academy, which provides blinks (such as impulses, short films, reflection questions) to help them prepare as well as for follow-up and consolidation.

Ideal group size: 8. Where required, we additionally offer 1-on-1 coaching sessions.

We tailor the concept to your requirements. Contact us to arrange your personal consultation!
